

KHYATI

AGRIGENETICS

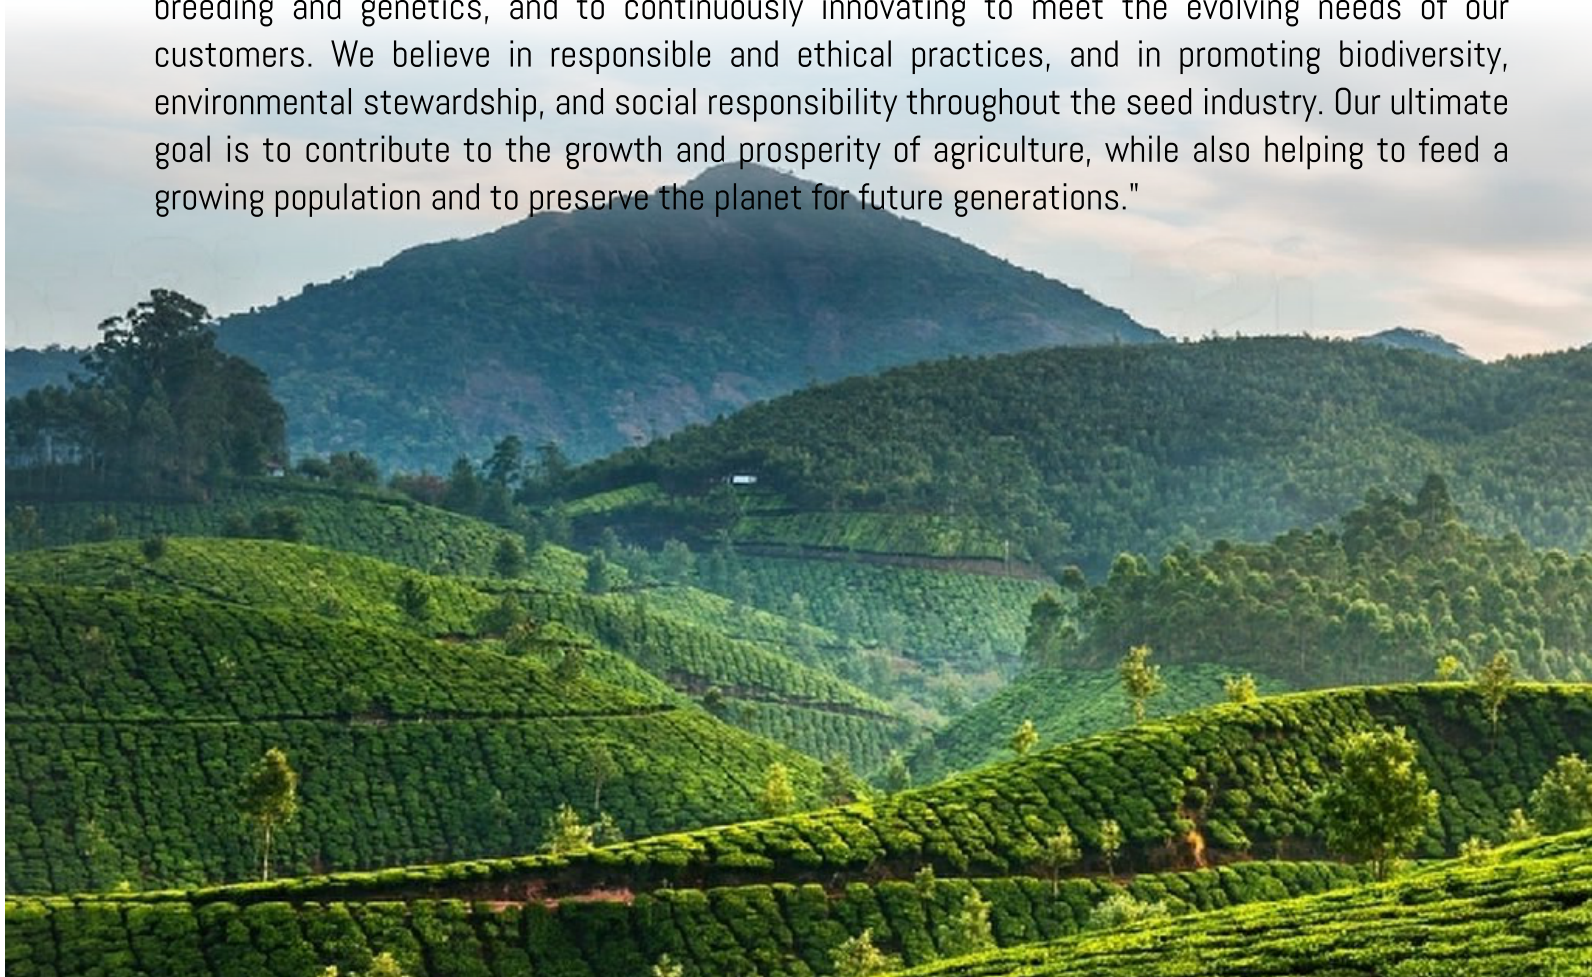

Best Quality Seeds...

VISION

"Our vision is to be a global leader in seed technology and innovation, recognized for our exceptional quality, performance, and sustainability. We aspire to be a trusted partner to farmers and gardeners worldwide, providing them with the knowledge, tools, and resources they need to succeed. We envision a future where agriculture is truly sustainable, where crops are resilient and adaptive to changing conditions, and where people have access to healthy and nutritious food. We are committed to making a positive impact on the world, and to creating a better future for all."

MISSION

"Our mission is to provide farmers and Growers with high-quality seeds that produce healthy, productive, and sustainable crops. We are committed to advancing the science of plant breeding and genetics, and to continuously innovating to meet the evolving needs of our customers. We believe in responsible and ethical practices, and in promoting biodiversity, environmental stewardship, and social responsibility throughout the seed industry. Our ultimate goal is to contribute to the growth and prosperity of agriculture, while also helping to feed a growing population and to preserve the planet for future generations."

RESEARCH & DEVELOPMENT

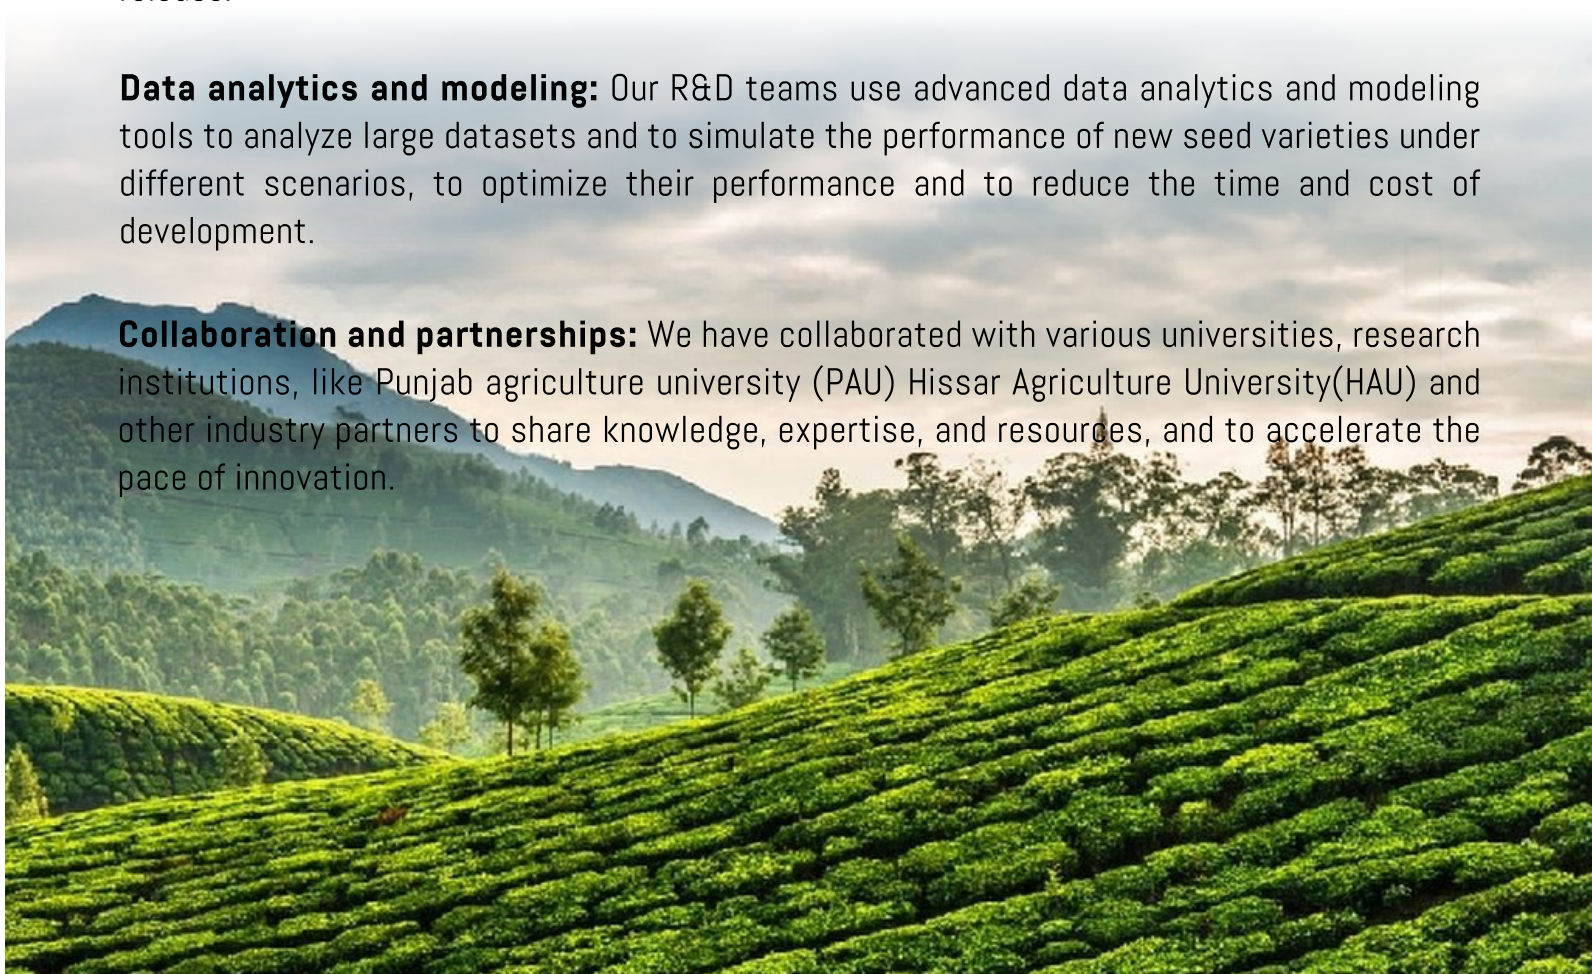

Breeding and genetics: Our R&D scientists use traditional and molecular breeding techniques to develop new seed varieties that are more resistant to diseases, pests, and environmental stresses, and that have improved yield, quality, and nutritional content. Developing new and improved plant varieties through Plant breeding is a primary focus of our company R&D. This involves identifying desirable traits, such as disease resistance, improved yields, and better flavor, and using traditional or modern breeding techniques to produce plants with those characteristics.

Trait discovery and development: Our R&D teams work on the discovery and development of new traits, such as drought tolerance, heat resistance, and pest resistance that can be incorporated into seed varieties to meet the evolving needs of farmers and consumers.

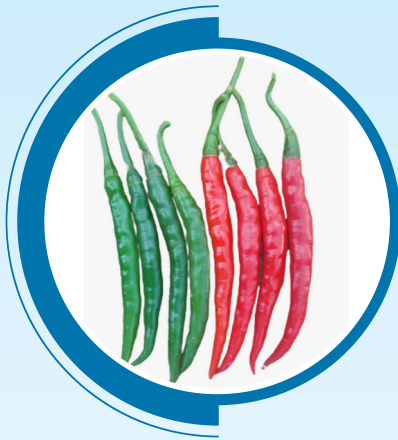

Testing and evaluation: Our R&D scientists conduct extensive testing and evaluation of new seed varieties under different environmental conditions, to ensure their performance and stability, and to identify any potential issues that need to be addressed before commercial release.

Data analytics and modeling: Our R&D teams use advanced data analytics and modeling tools to analyze large datasets and to simulate the performance of new seed varieties under different scenarios, to optimize their performance and to reduce the time and cost of development.

Collaboration and partnerships: We have collaborated with various universities, research institutions, like Punjab agriculture university (PAU) Hissar Agriculture University(HAU) and other industry partners to share knowledge, expertise, and resources, and to accelerate the pace of innovation.

CHILLI

KA 2629 Mahima

- USP** - Short Segment and High Pungency
- Strong Vigorous Plant
- Good & Early Drying

General Features

| | |
|-------------------------|-----------------------------------|
| Plant Growth Habit | : Erect & Short Internodal Length |
| Plant Height | : Medium |
| Fruit Size & Length | : 7-8 cm width 0.6-0.7 cm |
| Fruit Shape | : Flat Round Green Shoulders |
| Fruit Weight | : 3.5-4 Gm |
| Heat Value | : 75-80 SHU |
| Fruit Pungency | : Very High Pungent |
| Dry Fruit Powder Colour | : Dark Red |
| Disease Reaction | : Tolerent to CLCV PMD |

CHILLI

Ka2636 Vidhi

- USP** - Dual Purpose
- Suitable For Export Fetches Premium Prices
- Good & Early Drying

General Features

| | |
|-------------------------|---|
| Plant Growth Habit | : Bushy & Erect & Short Internodal Length |
| Plant Height | : Medium |
| Fruit Size & Length | : 8-9 cm width 0.6-0.8 cm |
| Fruit Weight | : 3.5-4 Gm |
| Heat Value | : 75-85 SHU |
| Fruit Colour | : Dark Green |
| Fruit Pungency | : Very High Pungent |
| Dry Fruit Powder Colour | : Dark Red |
| Disease Reaction | : Tolerent to CLCV PMD |

CHILLI

KA 1022 Pluto For Green

- USP** - Fresh Green Purpose
- Early & Heavy Bearing Strong Branches
- Harvesting Interval Less then two weeks

General Features

| | |
|---------------------|-------------------------------------|
| Plant Growth Habit | : Semi Spreading with more branches |
| Plant Height | : Medium |
| Fruit Size & Length | : 14-16 cm width 1.2-1.4 cm |
| Fruit Weight | : 7-9 Gm |
| Heat Value | : 30-35 SHU |
| Fruit Colour | : Light Green semi wrinkled fruit |
| Fruit Pungency | : Medium Pungent |
| Disease Reaction | : Tolerent to CLCV PMD |

CHILLI

KA 1033 Jwala

- USP** - Fresh Green Purpose
- Early & Heavy Bearing Strong Branches
- Harvesting Interval Less then two weeks

General Features

| | |
|---------------------|-------------------------------------|
| Plant Growth Habit | : Semi Spreading with more branches |
| Plant Height | : Medium |
| Fruit Size & Length | : 14-16 cm width 1.2-1.4 cm |
| Fruit Weight | : 6-8 Gm |
| Heat Value | : 30-35 SHU |
| Fruit Colour | : Light Green semi wrinkled fruit |
| Fruit Pungency | : Medium Pungent |
| Disease Reaction | : Tolerent to CLCV PMD |

CHILLI
KA 7080 PERINEETA

Colour Attractive green colour
 Use Suitable for drying Pungency High
 First harvest 50-55 days after transplanting
 Depth of sowing Less than 1 cm
 Fruit Size Length : 7- 8 cm Diameter : 1 cm
 Sowing season Kharif, Summer
 Sowing method Transplanting of seedlings
 Sowing spacing RR - 3.5 to 4 ft, PP - 1 to 1.5 ft
 Extra description Good keeping quality and high bearing

CHILLI
KA 7090 ANTRA

Colour Attractive green colour
 Use Suitable for drying Pungency High
 First harvest 50-55 days after transplanting
 Depth of sowing Less than 1 cm
 Fruit Size Length : 9 cm Diameter : 1 cm
 Sowing season Kharif, Summer
 Sowing method Transplanting of seedlings
 Sowing spacing RR - 3.5 to 4 ft, PP - 1 to 1.5 ft
 Extra description Good keeping quality and high bearing

BRINJAL
Jhumki (Small)

Small Size Oval Purple (Black Round)
 Semi Spreading Plant
 Fruit Oval Purple Medium Small Size
 In Clusters
 Fruit Weight 30-60 Gm
 First Picking 80 - 90 Days
 Sowing Time
 Kharif May- June
 Rabi Sep -Oct
 Summer Jan- Feb

BITTER GOURD

Chinchu (Small)

- USP** - More Female Flower
- Plant Canopy Open Type
- Early Bearing High Yield

General Features

| | |
|----------------------|--------------------------------|
| Plant Growth Habit | : Medium viny |
| Crop Duration | : 115-120 days |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Dark Green short Spiny Fruit |
| Fruit Size | : 5-6 cm thickness 1.8-2.5 cm |
| Fruit Weight | : 40-45 Gm |
| Fruit Weight / Plant | : 4-5 Kg |
| First Harvesting | : 45-50 Days |
| Disease Tolerance | : High to YMV |

BITTER GOURD

Maharaja (Medium Short)

- USP** - Dual Purpose
- Suitable For Export Fetches Premium Prices
- Early Bearing High Yield Early Setting Higher Yield

General Features

| | |
|----------------------|--------------------------------------|
| Plant Growth Habit | : Vigerous Long viny |
| Crop Duration | : 115-120 days |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Dark Green Medium Long Spiny Fruit |
| Fruit Size | : 10-12 cm thickness 2-3 cm |
| Fruit Weight | : 75-80 Gm |
| Fruit Weight / Plant | : 4-5 Kg |
| First Harvesting | : 75-80 Days |
| Disease Tolerance | : High to YMV |

BITTER GOURD

Syraha (Medium Long)

- USP** - More Female Flower
- Dark Green Spindle Shaped
- Good keeping & Shipping Quality
- Early Bearing High Yield Early Setting Higher Yield

General Features

| | |
|----------------------|--------------------------------------|
| Plant Growth Habit | : Vigerous Long viny |
| Crop Duration | : 115-120 days |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Dark Green Medium Long Spiny Fruit |
| Fruit Size | : 14-16 Cm thickness 2.5-3 cm |
| Fruit Weight | : 110-120 Gm |
| Fruit Weight / Plant | : 5-6Kg |
| First Harvesting | : 65-70 Days |
| Disease Tolerance | : High to YMV |

BITTER GOURD

Tridev (Long)

- USP** - More Female Flower
- Dark Green Spindle Shaped
- Good keeping & Shipping Quality
- Early Bearing High Yield Early Setting Higher Yield

General Features

| | |
|----------------------|--------------------------------------|
| Plant Growth Habit | : Vigerous Long viny |
| Crop Duration | : 120-130 days |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Dark Green Medium Long Spiny Fruit |
| Fruit Size | : 16-18 Cm thickness 2.5-3 cm |
| Fruit Weight | : 100-115 Gm |
| Fruit Weight / Plant | : 5-6Kg |
| First Harvesting | : 55-60 Days |
| Disease Tolerance | : High to YMV |

SPONGE GOURD
Maharani (Dark Segment)

USP - Vigorous & Strong Plant With Good Fruit Quality
 - High Heat Tolerance

General Features

| | |
|--------------------|----------------------------------|
| Plant Growth Habit | : Vigorous Strong Plant |
| Crop Duration | : 115-120 days |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Dark Green & Cylindrical Shape |
| Fruit Size | : 30-32 cm long |
| Fruit Weight | : 80-100 Gm |
| First Harvesting | : 60-70 Days |
| Disease Tolerance | : High to YMV |

SPONGE GOURD
Ridhima (Light Segment)

USP - Dual Purpose
 - Suitable For Export Fetches Premium Prices
 - Early Bearing High Yield Early Setting Higher Yield

General Features

| | |
|--------------------|-----------------------------------|
| Plant Growth Habit | : Vigorous Long viny |
| Crop Duration | : 115-120 days |
| Foliage Cover | : LGreen Dense Foliage |
| Fruit type | : Light Green & Cylindrical Shape |
| Fruit Size | : 30-32 cm long |
| Fruit Weight | : 80-100 Gm |
| First Harvesting | : 60-70 Days |
| Disease Tolerance | : High to YMV |

RIDGE GOURD
Ria

USP - Attractive Dark Green Straight Fruit
 - Good keeping & Shipping Quality
 - Early Bearing High Yield
 - Early Setting Higher Yield

General Features

| | |
|--------------------|----------------------------|
| Plant Growth Habit | : Vigorous Long viny |
| Crop Duration | : 115-120 days |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Dark Green & Long |
| Fruit Size | : 40-45 cm long |
| Fruit Weight | : 200-250 Gm |
| First Harvesting | : 45-50 Days |
| Disease Tolerance | : High to YMV |

OKRA
Viha

- USP** - Dark Green Pentagonal Fruits
 - Good keeping & Shipping Quality
 - Short Internode High Yielding Suitable for Export

General Features

| | |
|---------------------------|--------------------------------|
| Plant Type | : Tall |
| Plant Height & Final Pick | : 150-160Cm |
| Crop Duration | : 100-110 days |
| Foliage Character | : Dark Green Deep Lobed |
| Branches & Internode | : 3-4 Branches Short Internode |
| Fruit type | : Dark Green |
| First Flowering | : 40-45 Days |
| Fruit Length | : 12-14 Cm thickness 2.5-3 cm |
| Fruit Weight | : 120-130 Gm/10Fruits |
| First Harvesting | : 55 - 60 Days |
| Disease Tolerance | : High to YVMV |

OKRA
Naveli

- USP** - Uniform Green With Pensil Tip Fruits
 - Short Internode High Yielding Suitable for Export

General Features

| | |
|---------------------------|--------------------------------|
| Plant Type | : Tall with compact branches |
| Plant Height & Final Pick | : 150-160Cm |
| Crop Duration | : 100-110 days |
| Foliage Character | : Dark Green Deep Lobed |
| Branches & Internode | : 3-4 Branches Short Internode |
| Fruit type | : Dark Green |
| First Flowering | : 40-45 Days |
| Fruit Length | : 12-14 Cm thickness 2.5-3 cm |
| Fruit Weight | : 130-140 Gm/10Fruits |
| First Harvesting | : 55 - 60 Days |
| Disease Tolerance | : High to YVMV |

DOLICHUS
Dolfy

- USP** - Early Dark Green Attractive Shiny LusturousPods
 - Long Pods Non Stringy
 - Tolerant to Mosaic Virus & Powdery Mildew

General Features

| | |
|---------------|-------------------------------|
| Flowering | : 35-45 Days (50% Flowering) |
| Plant Height | : Semi Determinate |
| Flower Colour | : Purple |
| Pod Weight | : 5-6 Gm |
| Pod Length | : 12-13 Cm |

CARROT
Cozy Nantes

- USP** - Excellent Smooth Skin
 - Good Internal & External Quality
 - Excellent Bolting Tolerance

General Features

| | |
|-------------------|--|
| Foliage Type | : Medium to long Length |
| Crop Duration | : 100-110 days in Summer 120-150 days in Winter |
| Foliage Character | : Medium Green Colour |
| Fruit type | : Long Cylindrical & Slightly Tapered |
| Fruit Length | : 16-20 Cm thickness 2.5-3 cm |
| Disease Tolerance | : Alternaria |

CARROT
Hy of Nantes & Kuroda

- USP** - Very Strong Seedling Vigour & good Cold Emergence
 - Highly Adaptable with excellent ability
 - Excellent Bolting Tolerance

General Features

| | |
|-------------------|---|
| Foliage Type | : Medium to long Length |
| Crop Duration | : 90-100 days in Summer 110-130 days in Winter |
| Foliage Character | : Dark Green Colour |
| Fruit type | : Long Cylindrical & Slightly Tapered |
| Fruit Length | : 12-15 Cm thickness 2.5-3 cm |
| Disease Tolerance | : Alternaria Xanthomonas highly tolerant |
| Storage | : Average to Good |
| Market | : Fresh, Bunching, Processing |

CARROT
Lalima Rajasthan Variety

General Features

Sowing time august to October.
 Roots are sleek, Tender and tapering,
 15-18 inches long and dark red in colour.
 Red core, Very sweet taste,
 Suitable for long distance transportation.
 Attains red colour in 70 days after sowing.

BOTTLE GOURD
Yogini (Warad Seg)

USP - Vigorous & Strong Plant With Good Fruit Quality
 - High Heat Tolerance

General Features

Plant Growth Habit : Vigorous Strong with long vine
 Fruit type : Light Green Cylindrical
 Fruit Size : 35-40 Cm long
 Fruit Weight : .5-.7 Kg
 First Harvesting : 60 - 65 Days
 Blossom End Fruit Shape: Blunt
 Disease Tolerance : High to YMV

FRENCH BEANS
Frankie

USP - Early Green Shiny Pods
 - High Bearing

General Features

Flowering : 40-45 Days (50% Flowering)
 Plant Type : Bushy
 Pods / Plant : 45-50
 Pod Weight : 3-5 Gm
 Pod Length : 12-15 Cm

CLUSTER BEANS
Rohini

USP - Early Green Attractive Shiny Pods
 - High Bearing
 - Tolerant to Anthracnose & Powdery Mildew

General Features

Flowering : 30-35 Days (50% Flowering)
 Plant Height : 110 cm
 Plant Type : Bushy
 Pods / Plant : 150 average
 Pod Weight : 3 Gm
 Pod Length : 12-13 Cm

CAPSICUM
Cap Wonder (Green)

- USP** - Attractive Dark Green blocky Fruit
 - Suitable for Summer & Kharif Seasons
 - Good keeping & Shipping Quality
 - Early Bearing High Yield
 - Early Setting Higher Yield

General Features

| | |
|--------------------|--------------------------------------|
| Plant Growth Habit | : Erect Sturdy Vigorous Strong Plant |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Dark Green |
| Fruit Size | : 5-6 Cm long Dia 5-5.5 Cm Long |
| Fruit Weight | : 80-90 Gm |
| First Harvesting | : 90-95 Days |
| Disease Tolerance | : High to YMV CLCV PMD |

PUMPKIN
Puma

- USP** - Attractive Dark Green Straight Fruit
 - Round to flattish round in shape when mature
 - Good keeping & Shipping Quality
 - Medium sized hybrid with high yielding
 - Early Setting Higher Yield

General Features

| | |
|-------------------|--------------------------------------|
| Fruit maturity | : 60-70 days |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Dark Green Round to Flattish Round |
| Fruit Weight | : 4-5 Kg |
| First Harvesting | : 55-65 Days |
| Disease Tolerance | : High to YMV |

BEET ROOT
Better

- USP** - Stable Variety for year round production
 - Extremely Uniform
 - Very Good Flesh Quality & high Yield Consistent

General Features

| | |
|-----------------------|--|
| Plant & Leaf Habit | : Fully Erect |
| Leaf Colour | : Bright Green with some red |
| Shape | : Top Shape |
| Maturity | : 55-65 Days |
| Fruit Internal Colour | : Dark Red |
| Bolt Habit | : Late |
| Sugar Content | : High (12-15%) |
| Yield | : Very High |
| Disease Tolerance | : Cercospora Leaf Spot Moderate to powdery & Downy Mildew tolerant to Rhizotonia |

RADDISH

Divya

- USP** - Ideal for Cool season crop for planting from late summer Autumn & winter
- For summer Planting insure adequate soil moisture and reduce plant population and harvest early as high temp & high plant population trigger bolting
 - Extremely Uniform
 - Very Good Flesh Quality & high Yield Consistent

General Features

| | |
|--------------------|--|
| Plant & Leaf Habit | : Fully Erect |
| Leaf Colour | : Bright Green |
| Shape | : Long Cylindrical |
| Maturity | : 35-40 Days |
| Fruit Colour | : White Smooth |
| Taste | : Mild |
| Yield | : Very High |
| Disease Tolerance | : Cercospora Leaf Spot Moderate to powdery & Downy Mildew tolerant to Rhizotonia |

RADDISH

Pihu

- USP** - Ideal for Cool season crop for planting from late summer Autumn & winter
- For summer Planting insure adequate soil moisture and reduce plant population and harvest early as high temp & high plant population trigger bolting
 - Extremely Uniform
 - Very Good Flesh Quality & high Yield Consistent

General Features

| | |
|--------------------|--|
| Plant & Leaf Habit | : Fully Erect |
| Leaf Colour | : Bright Green |
| Shape | : Long Cylindrical |
| Maturity | : 35-40 Days |
| Fruit Colour | : White Smooth |
| Taste | : Mild |
| Yield | : Very High |
| Disease Tolerance | : Cercospora Leaf Spot Moderate to powdery & Downy Mildew tolerant to Rhizotonia |

PEAS

KS-20 (Researched)

- USP** - A good yielder with excellent stress tolerance that is well adapted to hotter climates
- Normal Leaf Dark green
 - Powdery Mildew Resistant

General Features

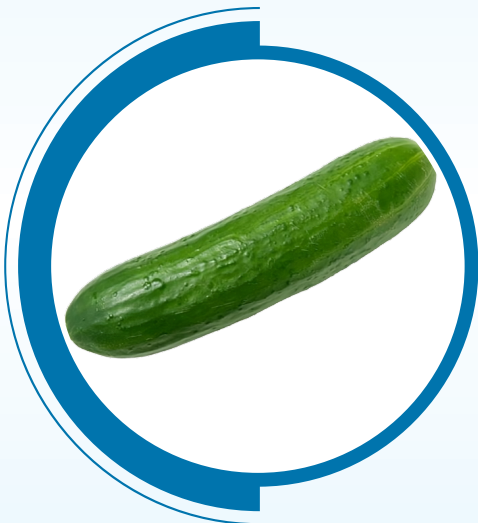

| | |
|---------------------------|--------------|
| Maturity | : 90 Days |
| 1 st Flowering | : 20-25 Days |
| Pod Shape | : Curved |
| No of Peas / Pod | : 9-11 |
| Pod Length | : 100 MM |

CUCUMBER
Milan (Seg-Malini)

USP - Uniform Fruit Shape & Size With Good Fruit Quality
 - High Heat Tolerance
 - Bitter Free Crispy & Tasty

General Features

| | |
|--------------------|----------------------------------|
| Plant Growth Habit | : Vigorous Strong Plant |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Dark Green & Cylindrical Shape |
| Fruit Size | : 18-20 Cm long |
| Fruit Weight | : 140-150Gm |
| First Harvesting | : 40-45 Days |
| Disease Tolerance | : High to YMV |

CUCUMBER
Trishul

USP - Uniform Fruit Shape & Size
 - High Heat Tolerance
 - Bitter Free Crispy & Tasty
 - High Yielding And Good Keeping Quality

General Features

| | |
|--------------------|-----------------------------|
| Plant Growth Habit | : Vigorous Strong Plant |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Medium Light Green Colour |
| Fruit Size | : 20-22Cm long & 4-4.6 Dia |
| Fruit Weight | : 200-220 Gm |
| First Harvesting | : 30-35 Days |
| Disease Tolerance | : High to YMV |

SUN FLOWER
Bhanu

Bhanu is a medium to full season maturity hybrid variety which enables it to maximize yield in various conditions

High Disease resistance resistance Powery downy Alternaria

Very High in Oil percentage of poly unsaturated oil

Head is semi pendulus which help to reduce sunburn and bird problem

ONION**Divya**

Sowing Season Kharif & Rabi

Sowing Period May-June & September-October

Harvesting Period August-September &

November-December

Colour Of The Fruit - Red

ONION**Pinky Pinky**

Sowing Season Kharif & Rabi

Sowing Period May-June & September-October

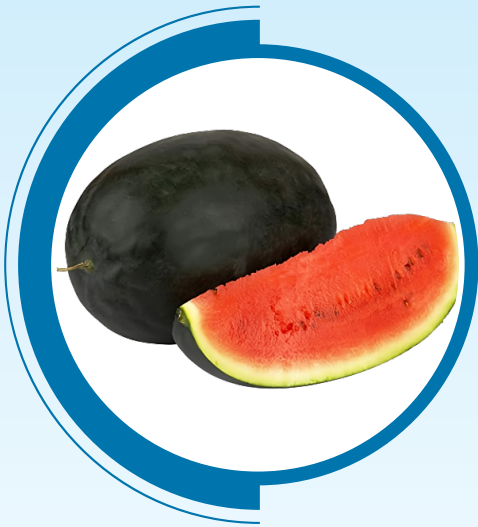

Harvesting Period August-September &

November-December

Colour Of The Fruit - Light Red

CORIANDER**Khushbu (Imported)**

Coriander seeds Italian origin excellent variety,
very slow bolting, multi cut, tall plant, young and
broad leaves stems having relatively good aroma

WATERMELON
Rudra

Mini seeded oval shaped fruits
 Very good shipping and keeping quality
 High fruit size uniformity
 Deep red crispy flesh
 11 to 13% brix
 4 to 5 Kg fruit size
 High yield
 High adaptability across India
 Strong and vigorous plants

WATERMELON
Shankara

Striped oval shaped Green fruits
 Very good shipping and keeping quality
 High fruit size uniformity
 Deep red crispy flesh
 13 to 15% brix
 5 to 6.5 Kg fruit size
 High yield
 High adaptability across India
 Strong and vigorous plants

MUSKMELON
Nector

USP - Thick Orange tender flesh & juicy
 - Rich in Aroma
 - High TSS 13-14%
 - High Tolerance to blight & Wilt

General Features

Plant Vigorous Plant with dark green foliage
 Fruit Colour : Light Colour grey green rind with dense net
 Fruit Shape : Globose
 Fruit Weight : 0.8-1 Kg
 TSS : 13-14%
 Harvest : 80-85 Days

FODDER SSG
Satya White

- USP** - Attractive Dark Green blocky Fruit
- Suitable for Summer & Kharif Seasons
 - Good keeping & Shipping Quality
 - Early Bearing High Yield
 - Early Setting Higher Yield

General Features

| | |
|--------------------|--------------------------------------|
| Plant Growth Habit | : Erect Sturdy Vigorous Strong Plant |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Dark Green |
| Fruit Size | : 5-6 Cm long Dia 5-5.5 Cm Long |
| Fruit Weight | : 80-90 Gm |
| First Harvesting | : 90-95 Days |
| Disease Tolerance | : High to YMV CLCV PMD |

FODDER SSG
Satya Red

- USP** - Attractive Dark Green blocky Fruit
- Suitable for Summer & Kharif Seasons
 - Good keeping & Shipping Quality
 - Early Bearing High Yield
 - Early Setting Higher Yield

General Features

| | |
|--------------------|--------------------------------------|
| Plant Growth Habit | : Erect Sturdy Vigorous Strong Plant |
| Foliage Cover | : Dark Green Dense Foliage |
| Fruit type | : Dark Green |
| Fruit Size | : 5-6 Cm long Dia 5-5.5 Cm Long |
| Fruit Weight | : 80-90 Gm |
| First Harvesting | : 90-95 Days |
| Disease Tolerance | : High to YMV CLCV PMD |

MULTICUT BAJRA
Surya

Multicut fodder hybrid Bajra, suitable for 3-5 cuts

Long broad & dark green leaves

High tillering with thin stems

Fast growing with reaching >110 cm in 50 days & ready for first Cut

MUSTURD
Bhola

| | |
|---------------------------|--------------|
| Plant height (cm) | 170-190 |
| No. of primary branches | 5-7 |
| No. of Secondary branches | 17-19 |
| No. of Pods per branches | 50-55 |
| Grains per pod | 6-7 |
| Maturity Periods | 125-135 days |

Specific Feature
 Tolerant to frost and white rust
 Pods stick to the branches
 Attractive plant type
 High oil % & yield
 High oil content of 38%
 Average yield of 22q/h
 Seed bold dark brown colour

MAIZE
Aditya (Single Cross)

Full maturity hybrid (110-115 days)
 Yield Potential: 65-70 Q./ha with shelling 80-82%.
 Uniform semi-erect & medium tall phenotype.
 Medium-high Cob placement, conical cobs with white shank.
 Cobs wholly covered with husk.
 Orange-yellow, semi-dent, medium-bold kernels
 Tolerant to lodging, stay green foliage at harvest
 Tolerant to MLB but challenged with post-flowering TLB & stock rot

MAIZE
Divya (Double Cross)

Full maturity hybrid (110-115 days)
 Yield Potential: 65-70 Q./ha with shelling 80-82%.
 Uniform semi-erect & medium tall phenotype.
 Medium-high Cob placement, conical cobs with white shank.
 Cobs wholly covered with husk.
 Orange-yellow, semi-dent, medium-bold kernels
 Tolerant to lodging, stay green foliage at harvest
 Tolerant to MLB but challenged with post-flowering TLB & stock rot

TOMATO
Atlus (Seg-Abhilash) Deter

- USP** - Suitable for open field and Staking
 - High Tolerance to TyLCV & TOSPO
 - Good Self Life & more Sourness

General Features

| | |
|--------------------|-----------------------------------|
| Plant Growth Habit | : Determinate |
| Plant Height | : Medium |
| Fruit Size | : 90-95 Gms |
| Fruit Shape | : Flat Round White Shoulders |
| First Harvesting | : 65-70 Days |
| Firmness of Fruit | : Very Tight Good Keeping Quality |
| Sourness of Fruit | : 2.5 to 3% |
| Disease Reaction | : Tolerent to TY1 TY2 & BW |

TOMATO
Golu (Shivam Semi Deter)

- USP** - High Heat Tolerance Suitable for Summers
 - Good Self Life & High Sourness Long Keeping Quality

General Features

| | |
|--------------------|--|
| Plant Growth Habit | : Determinate Dark Green Medium Foliage |
| Plant Height | : Medium |
| Fruit Size | : 95-100 Gms |
| Fruit Shape | : Flat Round Green Shoulders |
| First Harvesting | : 60-65 Days |
| Firmness of Fruit | : Very Tight Good Keeping Quality |
| Sourness of Fruit | : 2 to 2.5% |
| Disease Reaction | : Tolerent to TY1 Early Blight |

TOMATO
Raha (Seg-Sahoo) Deter

- USP** - Suitable for open field and Staking
 - High Tolerance to TyLCV & TOSPO
 - Good Self Life & more Sourness

General Features

| | |
|--------------------|-----------------------------------|
| Plant Growth Habit | : Determinate |
| Plant Height | : Medium |
| Fruit Size | : 95-100 Gms |
| Fruit Shape | : Flat Round White Shoulders |
| First Harvesting | : 70-75 Days |
| Firmness of Fruit | : Very Tight Good Keeping Quality |
| Sourness of Fruit | : 2.5 to 3% |
| Disease Reaction | : Tolerent to TY1 TY2 & BW |

CAULIFLOWER
Dharini

| | |
|--------------|-------------------------------|
| Sowing Time | : June to July |
| Harvest days | : 55-60 Days after Transplant |
| Shape | : Dome shape |
| Colour | : Creamy White |
| Weigh | : 700 Gm to 1.2 Kg |

CAULIFLOWER
Dhawni

| | |
|--------------|---------------------------------|
| Sowing Time | : Sep to 5 oct |
| Harvest days | : 50 - 55 Days after Transplant |
| Shape | : Dome shape |
| Colour | : Creamy White |
| Weight | : 1 Kg to 1.5 Kg : June to July |
| Harvest days | : 55-60 Days after Transplant |
| Shape | : Dome shape |
| Colour | : Creamy White |
| Weight | : 700 Gm to 1.2 Kg |

NURSURY PACK
Nursury Kitchen Garden Pack

All Vegetable Hybrids are available
in 5 to 10 gm pack
